

Base ESLint Config

Use these as a starting point for [ESLint](#) configuration on Vegan Hacktivists projects.

`.eslintrc.js`

```
/** @type import('eslint').Linter.Config */
module.exports = {
  root: true,
  env: {
    browser: true,
    es2021: true,
  },
  parser: '@typescript-eslint/parser',
  parserOptions: {
    ecmaVersion: 'latest',
    sourceType: 'module',
    project: './tsconfig.json',
  },
  extends: [
    'eslint:recommended',
    'plugin:react/recommended',
    'plugin:@typescript-eslint/recommended',
  ],
  overrides: [],
  plugins: ['react', 'react-hooks'],
  rules: {
    'react/require-default-props': ['off'],
    'react/function-component-definition': [
      'warn',
      { namedComponents: 'arrow-function' },
    ],
    'prefer-arrow-callback': ['warn'],
    'react/prop-types': ['off'],
    'react-hooks/exhaustive-deps': 'warn',
  },
}
```

```
'react/no-unescaped-entities': 'off',  
},  
ignorePatterns: ['*.js'],  
}
```

.eslintignore

```
node_modules  
/public  
/vendor
```
