

Base Prettier Config

Use these as a starting point for Prettier configuration on Vegan Hacktivists projects.

React Projects

```
{
  "overrides": [
    {
      "files": "/*. {js,jsx,ts,tsx}",
      "options": {
        "arrowParens": "always",
        "jsxBracketSameLine": false,
        "parser": "typescript",
        "printWidth": 80,
        "semi": false,
        "singleQuote": true,
        "tabWidth": 2,
        "trailingComma": "all"
      }
    },
    {
      "files": "/*.css",
      "options": {
        "parser": "css",
        "printWidth": 80,
        "singleQuote": true,
        "tabWidth": 2
      }
    },
    {
      "files": "/*.json",
      "options": {
        "parser": "json",
```

```
"printWidth": 80,  
"tabWidth": 2  
}  
}  
]  
}
```

Other Projects

Note: You'll want to install the [Laravel Blade plugin for Prettier](#).

```
{  
  "overrides": [  
    {  
      "files": "*.js",  
      "options": {  
        "arrowParens": "always",  
        "jsxBracketSameLine": false,  
        "parser": "babel",  
        "printWidth": 80,  
        "semi": false,  
        "singleQuote": true,  
        "tabWidth": 2,  
        "trailingComma": "all"  
      }  
    },  
    {  
      "files": "*.css",  
      "options": {  
        "parser": "css",  
        "printWidth": 80,  
        "singleQuote": true,  
        "tabWidth": 2  
      }  
    },  
    {  
      "files": "*.json",  
      "options": {  
        "parser": "json",
```

```
"printWidth": 80,  
"tabWidth": 2  
}  
,  
{  
  "files": "*.blade.php",  
  "options": {  
    "parser": "blade",  
    "sortTailwindcssClasses": true,  
    "tabWidth": 2  
  }  
}  
]  
}
```
